# 2003-0008

- Overview
- New Enhancements Requested
- **2003-0008**
- 2003-0009
- 2003-0010
- Product-Related Issues
- Discussion

- **Modify DD350 Report to show all unreported Construction actions regardless of dollar value**
- **Requested by TSgt Patrick Knepper, HQ ACC/LGC on 12 Sep**
- **Recommend FRB approval**
- **If approved, change may appear in the projected April maintenance release**

# 2003-0009

- **Modify DD350 Report to show the mod number in Block B2 of the report**
- **Requested by Tim Bennes, HQ ACC/LGC on 23 Oct**
- **This item is a bug, not an enhancement and was fixed in v5.0.4 (dated 31 Oct 03)**

- Discussion

# Integrity DD350 Standalone Mode

- Overview
- New Enhancements Requested
- Product-Related Issues
- **Standalone Mode**
- Error E-500 19
- Discussion

- Several sites have requested that the DD350 Standalone mode not require an “sa” login so that users can create DD350 reports for non-SPS contract actions
- Standalone mode was placed in product for contingency situations where an SPS server is unavailable
- Program direction limits Integrity contract reporting functionality to SPS users
  - ConWrite/ACPS users have own tool

# Integrity DD350 Standalone Mode

- **Questions for resolution:**
  - **Should Air Force users be allowed to write contracting actions without using either PD<sup>2</sup>, ConWrite, or ACPS?**
  - **If yes, what tool will be made available to them to help them meet their contract reporting obligations?**

# Error E-50019

- Overview
- New Enhancements Requested
- Product-Related Issues
- Standalone Mode
- **Error E-50019**
- Discussion

- Integrity DD350 Error E-50019 reads “B1B:If B1B=A, positions 7 & 8 of B1A must be the last 2 digits of FY in which initial contract number was assigned”
- Based on DCADS and J001 edit
- Difficulty occurs if parent award document was not correctly migrated from BCAS to PD<sup>2</sup> but rather was manually input
  - i.e, the release date in PD<sup>2</sup> is not in the same fiscal year as the true release date
  - Can be fixed with AMS “Release Date” script
- Difficulty also occurs when a document with an FY03 PIIN is awarded in FY04
